---

PROJECTS

Nostra Web Page   **May 2025**

Self-based

Tech Skills - HTML5, CSS3 JAVASCRIPT

Live site - https://mathiyarasan2102.github.io/Nostra-Project/

- Developed a fully responsive e-commerce product landing page with a modern UI/UX using HTML, CSS, and JavaScript
- Implemented dynamic interactions such as product filtering and smooth scrolling to enhance user experience.
- Optimized layout and assets for performance and mobile compatibility across various devices.

Apple Clone Website   **Jun 2025 - Present**

Self-based

Tech Skills - Vite, React, Tailwind CSS

Live site - https://clone-apple-lilac.vercel.app

- Built a high-fidelity clone of the Apple website using React and Tailwind CSS with Vite for fast performance.
- Designed reusable components like Navbar, Footer, Hero, and Product sections for a modular structure.
- Ensured full responsiveness and smooth scrolling animations for an enhanced user interface across devices.
- Practiced component-based architecture and clean code principles for better scalability and maintainability.
